Allowable Subject Matter

1. Claims 1-23 are allowed over prior art.

6. The following is a statement of reasons for allowance: As indicated in the previous office action claims 1-23 contain allowable subject matter. Applicant has canceled previously rejected claim 24.

Although the cited art discloses multiplexing scheme that includes multiplexing plurality tributary signals that includes section terminating circuits, section overhead that is terminated wherein the section terminating circuit removes section overhead, multiplexers/demultiplexers, each path associated with its own individual identification code, multiplexing/demultiplexing multiple tributary streams/signals in a SDH/SONET architecture, frame synchronization, extracting clock/section overhead for maintaining synchronization, multiplexing plurality of tributary signals associated with a main data stream (main line signal/main signal path), guard intervals between tributary lines/tributary circuits, outgoing/incoming tributary signal streams, framer detects the unique identification word pattern of each tributary signal, they fail to teach/suggest a plurality of receiving tributary circuits installed as many as the number of tributary signals multiplexed onto multiplex signal for supplying the downstream transmission paths with the tributary signals output from the demultiplexer, at least one of the receiving side tributary circuits detecting its frame information and making a decision on its identification code in response to the frame information detected, code phase difference decision circuit for comparing the identification code extracted by code
